2. (Currently Amended) The method of claim 1, further comprising ranking the prospect lists identified from in the database and associated with the at least one other list purchaser based on predetermined factors to identify prospect lists most relevant to the first list purchaser.
3. (Original) The method of claim 1, further comprising removing duplicate prospective customers from the targeted list of prospective customers.
4. (Original) The method of claim 1, wherein the database of prospective customers is a computer database available over a computer network via client computers to a plurality of list purchasers.
5. (Currently Amended) The method of claim 1, wherein the step of providing access to the first list purchaser includes
distributing the targeted list of prospective customers to the first list purchaser.
6. (Currently Amended) The method of claim 1, wherein the step of providing access to the first list purchaser includes
distributing the targeted list of prospective customers to a third party associated with either than the first list purchaser.
7. (Original) The method of claim 6, wherein the third party contacts prospective customers on behalf of the first list purchaser.
8. (Currently Amended) The method of claim 6, wherein the third party stores the targeted list of prospective customers on a storage medium and delivers the storage medium to the first list purchaser.

9. (Currently Amended) A computer-readable storage medium encoded with processing instructions for directing a computer to:

communicate with a database of prospect lists, in which each prospect list is associated with (i) at least one list purchaser who used the prospect list and (ii) for each list purchaser who used the prospect list, data that indicates whether the list was successful based on feedback from the list purchaser;

identify, from in the database of prospect lists, one or more previously successful lists of prospective customers in which each such list was generated for used by the a first list purchaser and is associated with data indicating that the list was successful for the first list purchaser based on feedback from the first list purchaser;

identify, from in the database of prospect lists, at least one other list purchaser who has used at least a subset one or more of the one or more previously successful lists identified for the first list purchaser;

for each of the at least one other list purchaser, identify, from in the database of prospect lists, one or more previously successful lists of prospective customers in which each such list was generated for used by each of the ether list purchaser[[s]] and is associated with data indicating that the list was successful for the list purchaser based on feedback from the list purchaser; and

provide access to the first list purchaser to a targeted list of prospective customers, the targeted list including at least one or more a subset of the successful lists of prospective customers identified for the first list purchaser and one or more of the successful lists identified for at least one of the at least one other list purchasers, to the first list purchaser.

10. (Currently Amended) The computer-readable storage medium of claim 9, further comprising processing instructions for directing the computer to

rank the prospect lists identified from in the database and associated with the at least one other list purchaser based on predetermined factors to identify prospect lists most relevant to the first list purchaser.

11. (Original) The computer-readable storage medium of claim 9, further comprising processing instructions for directing the computer to
remove duplicate prospective customers from the targeted list of prospective customers.

12. (Original) The computer-readable storage medium of claim 9, wherein the database is a computer database of prospective customers available over a computer network via client computers to a plurality of list purchasers.

13. (Original) The computer-readable storage medium of claim 12, wherein the database of prospective customers is coupled to the computer over a computer network.

14. (Currently Amended) A system for implementing a computerized prospect list service, the system comprising:
a server computer hosting a prospect list service accessible via client computers to a plurality of list purchasers; and,
a database of prospect lists, in which each prospect list is associated with (i) at least one list purchaser who used the prospect list and (ii) for each list purchaser who used the prospect list, data that indicates whether the list was successful based on feedback from the list purchaser;
~~the prospect list service including a user interface comprising controls whereby a list purchaser can access information concerning prospect lists stored in the database, the prospect list service being available via a computer network to assist a first list purchaser in generating and accessing a list of prospective customers based on previously successful lists of prospective customers generated for the first list purchaser being configured so as to: identify, in the database of prospect lists, one or more successful lists of prospective customers in which each such list was used by the first list purchaser and is associated with data indicating that the list was successful for the first list purchaser based on feedback from the first list purchaser;~~

Attorney Docket No. NMC-003.01

identify, in the database of prospect lists, at least one other list purchaser who used one or more of the one or more successful lists identified for the first list purchaser; for each of the at least one other list purchaser, identify, in the database of prospect lists, one or more successful lists of prospective customers in which each such list was used by the list purchaser and is associated with data indicating that the list was successful for the list purchaser based on feedback from the list purchaser; and provide access to the first list purchaser to a targeted list of prospective customers, the targeted list including one or more of the successful lists of prospective customers identified for the first list purchaser and one or more of the successful lists identified for at least one of the at least one other list purchaser.

15-16. (Cancelled)

17. (Currently Amended) The system of claim 15, wherein the prospect list service identifies at least one of the at least one other second list purchaser based on additional predetermined criteria relating the at least one of the at least one other second list purchaser to the first list purchaser.

18. (Currently Amended) The system of claim 17, wherein the predetermined criteria concerns a business of the first list purchaser and the at least one of the at least one other second list purchaser.

19-32. (Cancelled)

33. (Currently Amended) A method for generating a targeted list of prospective customers for a first list purchaser, the method comprising:

identifying, from in a computer database of prospect lists, a successful list of prospective customers that was used by for the first list purchaser and that is associated with

data indicating that the list was successful for the first list purchaser based on feedback from the first list purchaser;

identifying, ~~from~~ in the computer database, a set of additional at least one other prospect list[[s]] that includes at least one of the prospective customers included in ~~from~~ the successful list of prospective customers for the first list purchaser; and

providing access to the first list purchaser to a targeted list of prospective customers, the targeted list including at least one or more of the prospective customers from the set of additional at least one other prospect list, ~~to the first list purchaser~~.

34. (Currently Amended) The method of claim 33, wherein each of the prospective customers stored in the computer database ~~are~~ each is assigned a unique known party ID and wherein ~~the step of identifying~~ a set of additional the at least one other prospect list[[s]] includes

identifying, in the database, prospective customers stored in the database ~~having the~~ that have the same known party ID as the known party ID assigned to at least one of the prospective customers from the successful list of prospective customers for the first list purchaser.

35. (Currently Amended) The method of claim 33, wherein the ~~step of identifying~~ a set of additional the at least one other prospect list[[s]] includes

identifying, in the database, prospective customers stored in the database ~~having at least one attribute[[s]] similar to at least one attribute[[s]] of at least one of the~~ prospective customers from the successful list of prospective customers for the first list purchaser.

36. (Currently Amended) The method of claim 33, further comprising
ranking the successful at least one other prospect list[[s]] identified ~~from~~ in the computer database based on predetermined factors to identify prospect lists most relevant to the first list purchaser.

Attorney Docket No. NMC-003.01

37. (Original) The method of claim 33, further comprising
removing duplicate prospective customers from the targeted list of prospective
customers.
38. (Currently Amended) The method of claim 33, wherein the step of providing access to
the first list purchaser includes
distributing the targeted list of prospective customers to the first list purchaser.
39. (Currently Amended) The method of claim 33, wherein the step of providing access to
the first list purchaser includes
distributing the targeted list of prospective customers to a third party associated with
other than the first list purchaser.
40. (Original) The method of claim 39, wherein the third party contacts prospective
customers on behalf of the first list purchaser.
41. (Original) The method of claim 39, wherein the third party stores the targeted list of
prospective customers on a storage medium and delivers the storage medium to the first list
purchaser.
42. (Currently Amended) The method of claim 33, further comprising
soliciting feedback from the first list purchaser to evaluate success of a prospect the
targeted list provided to the first list purchaser.
43. (Original) The method of claim 42, further comprising
storing the feedback from the first list purchaser in the computer database.
44. (Cancelled)

45. (Currently Amended) A computer-readable storage medium encoded with processing instructions for directing a computer to:

identify, from in a computer database of prospect lists, a successful list of prospective customers that was used by for the first list purchaser and that is associated with data indicating that the list was successful for the first list purchaser based on feedback from the first list purchaser;

identify, from in the computer database, a set of additional at least one other prospect list[[s]] that includes at least one of the prospective customers included in from the successful list of prospective customers for the first list purchaser; and

provide access to the first list purchaser to a targeted list of prospective customers, the targeted list including at least one or more of the prospective customers from the set of additional at least one other prospect list, to the first list purchaser.

46. (Currently Amended) The computer-readable storage medium of claim 45, wherein each of the prospective customers stored in the computer database are each is assigned a unique known party ID and further comprising processing instructions for directing the computer to

identify, in the database, prospective customers stored in the database having the that have the same known party ID as the known party ID assigned to at least one of the prospective customers from the successful list of prospective customers for the first list purchaser.

47. (Currently Amended) The computer-readable storage medium of claim 45, wherein the processing instructions for directing the computer to identify[[ing]] a set of additional the at least one other prospect list[[s]] includes processing instructions for directing the computer to

identify[[ing]], in the database, prospective customers stored in the database having at least one attribute[[s]] similar to at least one attribute[[s]] of at least one of the prospective customers from the successful list of prospective customers for the first list purchaser.

48. (Currently Amended) The computer-readable storage medium of claim 45, further comprising processing instructions for directing the computer to rank the ~~successful~~ at least one other prospect list[[s]] identified ~~from~~ in the computer database based on predetermined factors to identify prospect lists most relevant to the first list purchaser.

49. (Original) The computer-readable storage medium of claim 45, further comprising processing instructions for directing the computer to removing duplicate prospective customers from the targeted list of prospective customers.

50. (Currently Amended) The computer-readable storage medium of claim 45, further comprising processing instructions for directing the computer to solicit feedback from the first list purchaser to evaluate success of the targeted a prospect list provided to the first list purchaser.

51. (Original) The computer-readable storage medium of claim 50, further comprising processing instructions for directing the computer to store the feedback from the first list purchaser in the computer database.

52. (Cancelled)

53. (Currently Amended) A computer system for generating a targeted list of prospective customers for a first list purchaser, the computer system comprising: means for storing a database of prospect lists, in which each prospect list is associated with (i) at least one list purchaser who used the prospect list and (ii) for each list purchaser who used the prospect list, data that indicates whether the list was successful based on feedback from the list purchaser;

PATENTS
Attorney Docket No. NMC-003.01

a network interface for connecting the computer system to a computer network, the computer system being accessible over the computer network via client computers to a plurality of list purchasers,

means for providing a user interface comprising controls whereby a list purchaser can access information concerning prospect lists stored in the database, and

means for generating ~~a list of prospective customers~~ the targeted list for the first list purchaser ~~based on previously successful lists of prospective customers generated for the first list purchaser, the means being configured to:~~

identify, in the database of prospect lists, one or more successful lists of prospective customers in which each such list was used by the first list purchaser and is associated with data indicating that the list was successful for the first list purchaser based on feedback from the first list purchaser;

identify, in the database of prospect lists, at least one other list purchaser who used one or more of the one or more successful lists identified for the first list purchaser;

for each of the at least one other list purchaser, identify, in the database of prospect lists, one or more successful lists of prospective customers in which each such list was used by the list purchaser and is associated with data indicating that the list was successful for the list purchaser based on feedback from the list purchaser; and

provide access to the first list purchaser to the targeted list of prospective customers, the targeted list including one or more of the successful lists of prospective customers identified for the first list purchaser and one or more of the successful lists identified for at least one of the at least one other list purchaser.

54-55. (Cancelled)

56. (Currently Amended) The computer system of claim 54, wherein the means for generating the targeted list is configured to identify at least one of the at least one other second list purchaser is identified based on additional predetermined criteria relating the at least one of the at least one other second list purchaser to the first list purchaser.

PATENTS
Attorney Docket No. NMC-003.01

57. (Currently Amended) The computer system of claim 56, wherein the predetermined criteria concerns a business of the first list purchaser and the at least one of the at least one other second list purchaser.

58. (Cancelled)
